Claims 1 and 10 do not comply with Section 28.3 of the Patent Act. The subject matter of these claims would have been obvious on the claim date to a person skilled in the art or science to which they pertain having regard to Otto.

Claims 1 and 10 are indefinite and do not comply with Subsection 27(4) of the Patent Act. In these claims as independent claims, the abbreviation of the term "ACD" should be explicitly defined at its first occurrence. The word "ACD" should read -automatic call distribution-.

In view of the foregoing defects, the applicant is requisitioned to amend the application in order to comply with the Patent Act and the Patent Rules or to provide arguments as to why the application does comply.

Under Section 29 of the Patent Rules, applicant is requisitioned to provide an identification of any additional prior art cited in respect of the corresponding United States and European Patent Office applications and the patent numbers, if granted. Amendment to avoid references cited abroad may make further action unnecessary.
